DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Rejections not maintained are withdrawn.

Response to Amendment

3. Claims 1, 4-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kinzer et al. (5667893) either individually, or in view of Wiest et al. (US 4322516) for claims 6 and 11, substantially for the reasons set forth in sections 5 and 6 of Paper No. 6, together with the following additional observations.

It is noted that claim 1 has been amended to incorporate the limitations of claims 2 and 3 (which have been cancelled). However, Applicants have not expressly argued the reasoning of why such an amendment would have rendered the previous rejection under 102(b) and 103(a) moot (Response, page 3, first paragraph). Nevertheless, the Examiner believes that the reasons set forth in sections 5 and 6 of Paper No. 6 are now applicable to reject all the claims under 103(a).

With respect to Applicant's Response requesting references for the Official notice of "applying a release coating to advantageously form an adhesive tape roll and applying appropriate amount of acrylate adhesive as pressure-sensitive adhesive are well known", it should be noted that a challenge to the taking of judicial notice must contain adequate information or argument to create on its face a reasonable doubt

Art Unit: 1771

regarding the circumstances justifying the judicial notice. If justified, the examiner should not be obliged to spend time to produce documentary proof. If the knowledge is of such notorious character that official notice can be taken, it is sufficient so to state (see MPEP 2144.03). Nevertheless, note also as evidence of the state of the art Bemmels (US 3617362) which teaches that the tape may include various other layers or coatings, such as primers, release coatings, and the like, which are used in the manufacture of pressure-sensitive adhesive tapes (column 3, lines 15-18), and Table A illustrates various examples of formulations (column 4) for forming pressure sensitive adhesives.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
